

CRIMSAFE
ULTIMATE

SUPERIOR HOME SECURITY

With Crimsafe Ultimate, an even greater level of strength and security is achieved. Crimsafe Ultimate is 40% stronger than Crimsafe Regular and seven times stronger than the required impact level to comply with the Australian Standards security door regulations. Crimsafe Ultimate provide a sophisticated home security network to protect your family.

TECHNICAL INFORMATION

Tensile-Tuff® Security Mesh

Crimsafe Ultimate Doors feature Crimsafe Tensile-Tuff® Security Mesh, which is made of 304 Grade Stainless Steel. This mesh consists of strands that are 0.9mm thick, making it 7 times stronger than Australian Standard.

Screw Clamp System

Crimsafe Ultimate features Crimsafe's patented Security Screw Clamp System. While inferior products simply glue or wedge mesh into a frame, Crimsafe sandwiches Tensile-Tuff® Security mesh between two serrated pieces of aluminium, then screws this mesh into place. This results in a strong, vice-like grip which has a much stronger tolerance to force than many competing products. Tamper-resistant screws bind the Screw-Clamp, mesh and frame together, creating a tightly integrated system which ensures greater security. One of a few key differences between Crimsafe Ultimate and Crimsafe Regular is that there are twice as many tamper-resistant screws in an Ultimate door than in a Crimsafe Regular door.

Clip-on Cover

Crimsafe Ultimate also features a clip-on cover which creates a sealed chamber, concealing the screw clamp system and protecting it from the elements, as well as adding an extra layer of security.

Colour

Crimsafe Ultimate is available in a variety of different frame colours. Various woodgrain and custom colours are also available, and offer a look that is impressively realistic.

Triple Lock

All Crimsafe Doors come fitted with a triple lock, which is manufactured from stainless steel for superior strength that meets all Australian quality standards.

Mid-rails

For extra security, mid-rails can come standard with your Crimsafe Doors. Mid-rails help strengthen the resistance of your door's lock against a jemmy attack and protect the hinges by reducing an intruder's ability to lever it from the wall. Mid-rails also form a visual safety barrier.

BENEFITS

Superior strength against impact

Seven times higher than impact testing standards.

Streamlined

Crimsafe Ultimate offer a sleek design and contemporary style.

Energy-efficient

Crimsafe reduces solar heat gain by up to 53%. The Tensile-Tuff® security mesh also blocks 62% of harmful UV rays.

Satisfaction Guaranteed

Crimsafe Ultimate comes with a 10 Year standard Warranty, with the option to extend to 15 years.
