

VISION BLINDS

DRESS TO IMPRESS

Vision blinds combine the ideal balance of privacy and light control with the fashionable, eye-catching trend of bold stripes and colour blocking. It features a double layer of translucent and opaque strips of fabric, creating a striped pattern. The front layer moves independently from the back, allowing the stripes to glide past each other giving you control over the amount of light or privacy. Vision Blinds are as practical as Roller Blinds, but offer a contemporary edge and sophistication.

TECHNICAL INFORMATION

Control

Vision Blinds are operated by chain control, or Wynnemotor motor. The control chain, or motor, is used to raise and lower the blind, while also giving the ability to align the stripes for privacy or light filtering.

Fabric

With Vision Blinds, you'll be spoilt for choice with colours and fabrics. Choose from an extensive range of contemporary colours and fabric palettes. These palettes consist of statement stripes featuring a range of dramatic metallic finishes, pretty sheers and natural woven effects.
