

WYNMOTION

THE AUTOMATED BLINDS
& AWNINGS SOLUTION

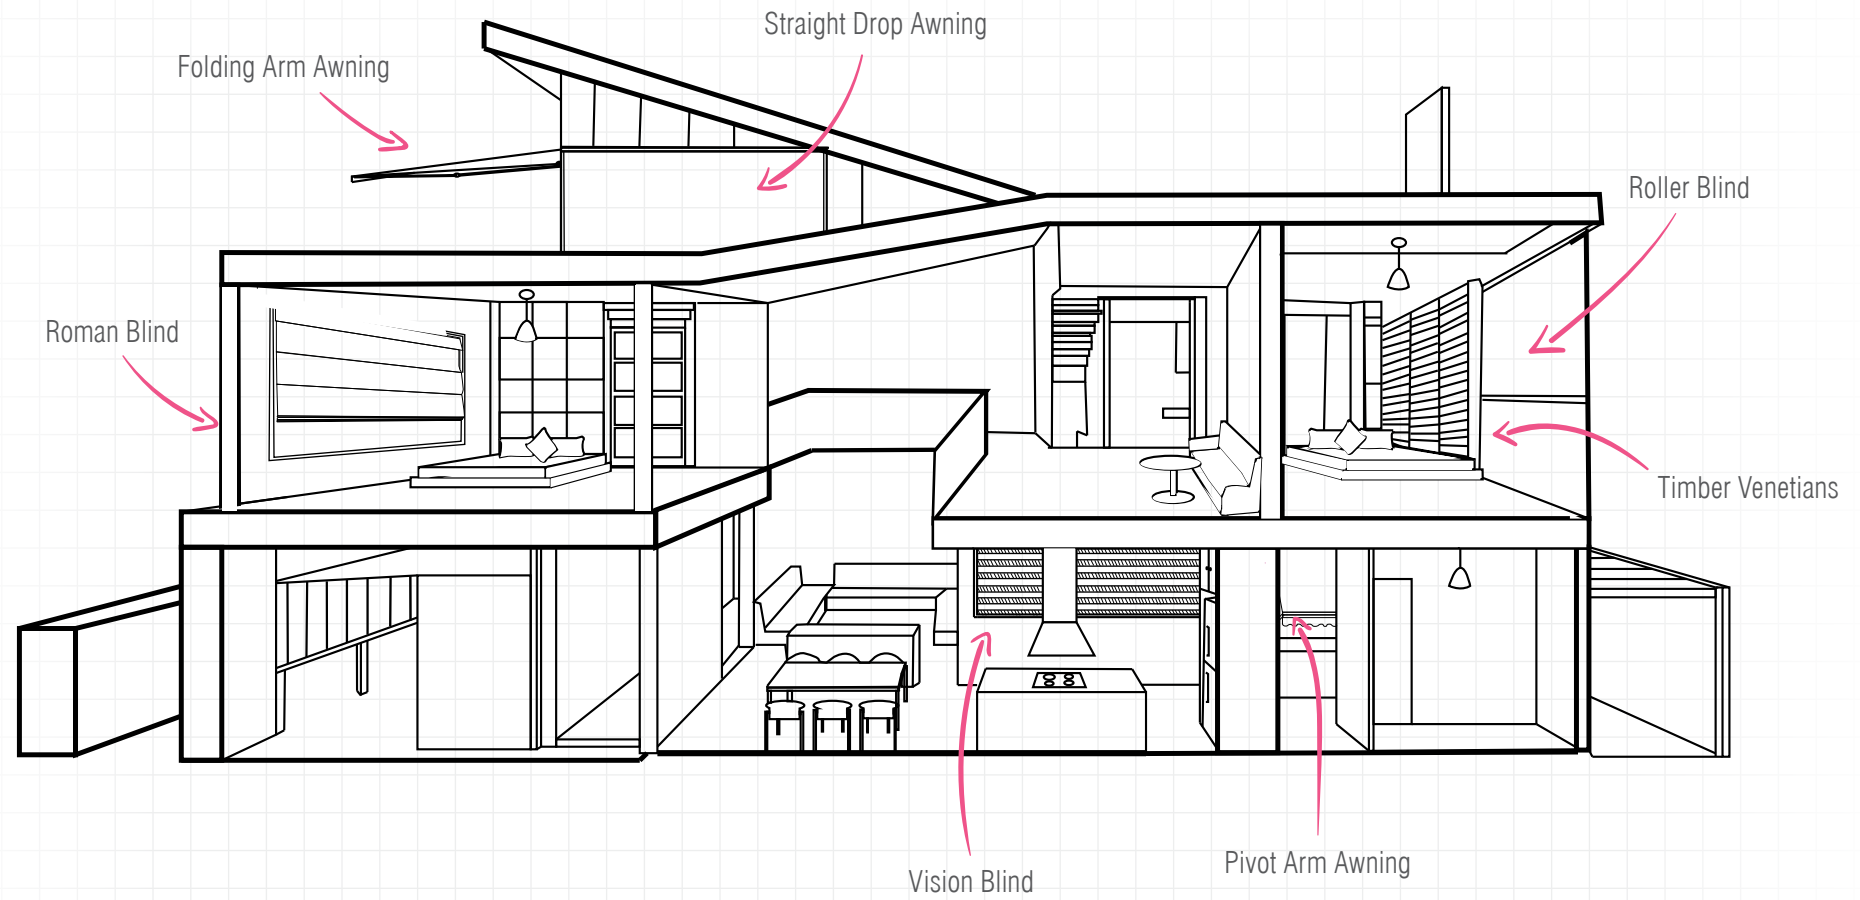

Wynstan
BLINDS DOORS SHUTTERS AWNINGS

Wyn Wyn Scenario

The Wynmotion range of products are especially designed for a relaxed Australian lifestyle, allowing you to say goodbye to cords and levers and replace them with a stylish little remote or smartphone app. This labour-saving technology also prevents little ones from getting tangled in cords.

Your Wynmotion system will help keep your Blinds and Awnings looking better for longer. When utilised well, these systems can aide in reducing overall energy costs. Automated Blinds and Awnings do not incur the same level of wear and tear as a manually operated one.

With Wynmotion
your windows will
never look back.

A Wynmotion window
covering system
is designed to add
effortless luxury to
your home – not just
today – but all your
tomorrows as well.

Each one of our motors is carefully
engineered, painstakingly tested, then
rigorously checked and re-checked to
make sure it lives up to our exacting
standards and your high expectations.

You can be confident that once a system
is in your home, it's there for the long
haul – as the 5-year warranty on every
one of our motors proudly guarantees.

If you can charge a phone, you can charge our Lithium Motors.

While you may not have heard of a Lithium Rechargeable Motor before, they're easier to operate than a mobile phone.

Made with Roller, Roman and Vision Blinds in mind, these motors are state-of-the-art design and simple to recharge. In fact, as simple as getting on the phone to us and ordering one today.

6M LONG CHARGING CABLE

Reduces the need for extra extension cords to reach a power point.

BATTERIES HIDDEN INSIDE THE MOTOR

No unsightly external battery packs.

CAN BE INSTALLED IN MOST WINDOWS

Save on electrician costs.

200 CYCLES PER CHARGE

Only needs to be charged four times per year.

QUICK CHARGED

Fully charged in three hours.

REMOTE CONTROLLED

Can be used with any Wynmotion remote.

NO CORDS

No permanent cords, making it 100% safe.

Found in:

Roller Blinds

Roman Blinds

Vision Blinds

Mains Powered Motors – blindingly simple.

The main reason you'll love our Mains Powered Motors for blinds is how easy they are to set up and control.

Whether connected to a home automation system, or used as remote-controlled motors, our Mains Powered Motors are what you're looking for. To get one up and running in your home, simply give us a call.

REMOTE OR HOME AUTOMATION

Can connect to any home.

ENERGY EFFICIENT

Wynmotion sensors automatically control blinds and awnings to keep your home cooler in summer and warmer in winter.

NEVER NEEDS RECHARGING

Once set up, you don't need to worry about it.

REMOTE CONTROLLED

Can be used with any Wynmotion remote.

NO CORDS

100% child safe

Venetians

Mains Powered Motors – awesome for awnings.

Traditional awnings are operated with an old-fashioned crank handle. Trudging around the house, laboriously opening and closing each one by hand is enough to make anyone cranky.

With the power to lift the largest in the Wynstan range, the raw power of Wynmotion Mains Powered Motors is awe-inspiring.

You can watch it all unfold at the touch of a button, and save all the strain on your arms and back.

*SELF-TIGHTENING OPTION

Greater level of wind control for Straight Drop Awnings.

Sensors that make perfect sense

Designed for the unpredictable Australian climate, Wynmotion sensors are clever enough to operate your blinds and awnings in response to changes in weather.

Future living with Wynmotion isn't just about luxury, but also a sense of safety.

Automatic weather
control for blinds
and awnings.

MOVEMENT SENSOR

For premium protection against damage by high winds and the elements, our Movement Sensors immediately retract an awning when it's in danger of moving beyond its limit.

SUN-WIND SENSOR

Our Sun-Wind sensors stay on constant alert outside your home. They open and close both internal and external blinds to best suit the temperature. When it gets too windy, they retract external awnings automatically.

Control is in good hands: yours

The power to control a Wynmotion system is in the palm of your hand. You can do it from the comfort of your bed, or out in the yard. Whatever your needs, we have all the remote possibilities covered.

RANGE
200m outdoors*
30m indoors*

UNIQUE CODE
Each motor has a unique code.

FULL RANGE CONTROL
Each Wynmotion remote can control any type of Wynmotion motor.

Single-Channel Remote

A single-channel remote can control from 1 to 20 motors around your house simultaneously. One click can have all the Wynmotion motors around your home opening and closing in perfect harmony.

5-Channel Remote with Timer

The 5-channel remote has a timer that allows you to pre-set the opening and closing of blinds and awnings. Wake up to sunshine streaming through the window, rather than fumbling around in the dark for your alarm-snooze button.

15-Channel Remote

Our 15-channel remote allows you to control more blinds and awnings around your home. Blinds can be controlled separately or on grouped channels.

Single-Channel Remote

15-Channel Remote

5-Channel Remote

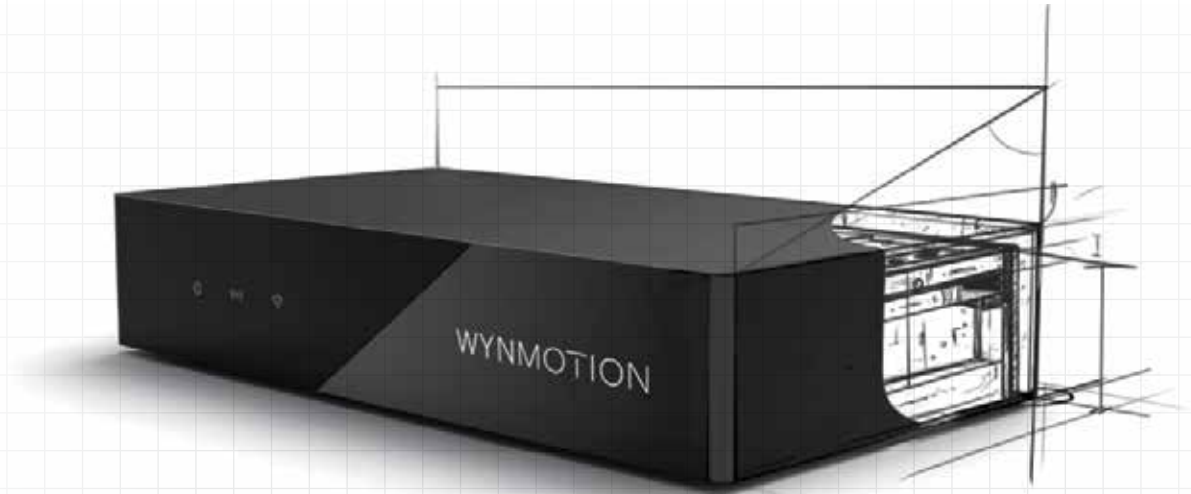

Smart Home System

The Wynmotion app is designed and developed to integrate your automated Wynstan products with your Smart Home System. The app provides a greater level of luxury and time-saving features that can be controlled from your smartphone.
