

**CELLULAR**  
SKYLIGHT

**AUTOMATED SKYLIGHT SYSTEM - *IT'S FINALLY HERE!***

Wynstan Cellular Skylights are specifically designed, as the name suggests, for skylights. Our Cellular Skylight is an advanced motorised pleated blind that designed to not only block light but also aid in insulating your home. The cellular structure resembling honeycomb causes air passing through the blinds gets to trapped in the structure, creating a thermal barrier. All of our Cellular Skylights come standard with WYNMOTION automation.

# TECHNICAL INFORMATION

## Operation

The Cellular Skylight is motorised by Wynmotion and controlled using a remote, or Smart Home System.

## Skylights

The Cellular Skylight is one of the few products that works effectively inside a skylight. It can be set-up to either block out or filter light entering the room.

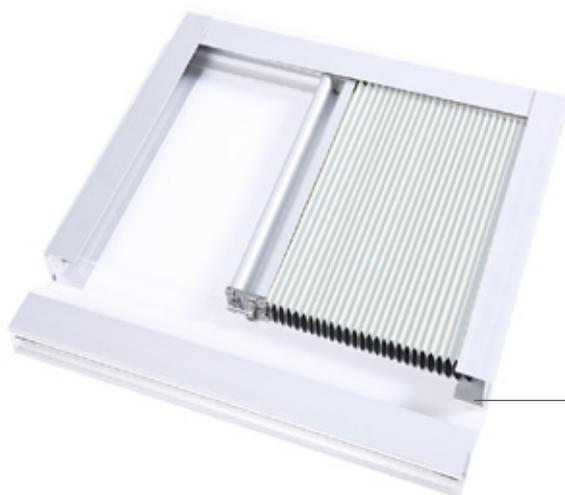

## Fabric

The Cellular Skylight comes with blackout and translucent cellular fabrics.

## Sizing

The Cellular Skylight can be manufactured to 3000(L) x 1500(W) mm, effectively covering even very large skylight panels. The minimum size is 600(L) x 400(W) mm. The cell size is 15mm in diameter.

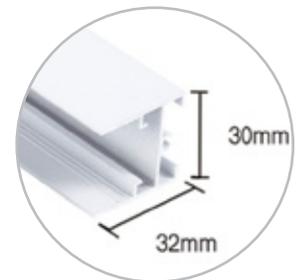

# BENEFITS

Motorised Track

Non-Motorised Track

Close-up of Translucent fabric

Close-up of Block out fabric

## Energy Saving

A unique honeycomb structure saves energy by trapping air, making it easier to heat and cool your home. Cellular Shades provide the most insulation compared to any other soft window furnishing product.

## Easy to Control

Cellular Skylights are motorised with Wynmotion, which you can easily control with the touch of a button.

## Minimal light gap

Skylight Cellular fit tightly within the track leaving little to no light leaks.

## Satisfaction Guaranteed

Quality installation is assured with our specialist team, and peace of mind with a Wynstan 3 year warranty.\*

\*For more information about our Wynstan 3 year warranty, please see our Warranty & Care Guide manual.
