Thank you for considering Wynstan for your window and door fashions. You may be familiar with our saying “Hello, I’m Wynstan, Wynstan with a Y”, but did you also know we are one of Australia’s oldest and most trusted Manufacturers and Retailers of custom window and door fashions?

Our family owned and operated business has been supplying homes with blinds, doors, shutters and awnings since 1968. All of our products are backed by our three year warranty and are made from scratch, using only quality materials, to ensure you and your family enjoy them for many years to come. We feel strongly about keeping your little ones safe, so we fit our blinds with child safety devices or one of our many Wynmotion motorisation options. To learn more about these safety devices please visit our website at [wynstan.com.au](http://wynstan.com.au).

At Wynstan, we understand you have unique needs when it comes to your home. Whether you want to update your décor, reduce your running costs, better utilise your outdoor

area or increase your security, our team will help you choose the product that perfectly matches your lifestyle. If you need ideas, why not pop into your local Showroom where you can see and touch displays and chat to our team who are on hand to offer you expert advice. If you prefer, we can come to you, simply visit our website at [wynstan.com.au](http://wynstan.com.au) or call our team on **1300 667 679** to arrange your free in-home consultation.

So, browse through this brochure, grab a little inspiration, and get ready to transform your home with the help of Wynstan. With a quality product range spanning from blinds, shutters, awnings to security doors, experienced staff and a Showroom nearby, why would you buy anywhere else?

*Wynstan*  
BLINDS / DOORS SHUTTERS AWNINGS

# THE WYNSTAN WAY

The Wynstan process is easy with just four simple steps.

## STEP 1

### BOOK US IN

Book your free in-home consultation by calling your local Wynstan Showroom on **1300 667 679**, or by visiting our website **wynstan.com.au**. If you need a little inspiration, why not pop into your local Showroom where you can try out our product displays and gain some friendly/expert advice.

## STEP 2

### WE COME TO YOU

Once your in-home consultation has been booked, a Wynstan Sales Consultant will visit you to provide a free measure and quote. Your consultant will show you product samples and swatches to select from, all within the comfort of your own home.

## STEP 3

### WE MANUFACTURE YOUR PRODUCT

In our leading-edge manufacturing facility, your products are custom made to suit your home using quality materials and workmanship. Wynstan products are built to last, providing peace of mind and ensuring that you will enjoy them for years to come.

## STEP 4

### DON'T LIFT A FINGER!

At a time that is convenient for you, an expert member of our Installation Team will come to your home and install your product. Then all that is left is for you to sit back, relax, and enjoy your fabulous new Wynstan product.

# BLINDS

WYNSTAN is proud to offer a vast range of blinds including Roller Blinds, Roman Blinds, Vertical Drapes and Venetian Blinds.

Many Wynstan blinds can also be motorised, for the ultimate in luxury and convenience. Look for the 'Why not add Wynmotion' symbol to learn if a product can be motorised.

---

Home *needs* to be that  
place where you can escape  
from the rest of life...

Let Wynstan help you turn  
your house into a home.

# ROMAN BLINDS

Roman Blinds offer the best of both worlds; tailored fabric folds give sophisticated style, whilst the pull-up design is practical.

When drawn high, the fabric folds create a fashionable pelmet effect that will add an extra dimension to any window. To ensure you achieve your desired look, we carry a variety of quality block-out, sunscreen and light filtering fabrics in a wide range of colours, patterns and textures. These fabric options offer a high level of shading, privacy and insulation benefits. Roman Blinds can be manually operated by cord or chain, or they can be motorised.

We also manufacture Batten Blinds, which are Roman Blinds fitted with slim wooden strips along the horizontal joins of the fabric. These timber battens give character and texture to the blind and are available in a number of different shades so you can match them to other wooden objects in your room. Like Romans, Batten Blinds can be operated manually by cord or chain, or can be motorised.

Roman Blinds can be made with an extensive range of fabrics, meaning there is an option to suit any decor.

# ROLLER BLINDS

Create a sleek, modern look with a fashionable Roller Blind. Roller Blinds are neat and discreet when pulled up and tasteful when pulled down.

We offer an extensive range of quality fabrics in a number of colours, patterns and textures. Blockout fabrics are great for bedrooms and light-filtering fabrics work wonders in living areas.

We offer a variety of bottom rails and trims to top off your look. Should you desire an even sleeker finish, we can conceal the top roller mechanism with a stylish fascia or cassette.

Roller Blind operation is by chain control, and if you have large windows where multiple blinds are needed, we can link them together to enable operation by a single control. Roller Blinds can also be motorised for ultimate convenience.

Like all Wynstan products, Roller Blinds come fitted with child safety devices.

# DOUBLE ROLLER BLINDS

A Double Roller Blind provides even greater light control, making it well suited to bedrooms.

The system involves positioning a blackout fabric on one roller in front of a sunscreen or light-filtering fabric on another roller, allowing you to adjust the blinds independent of each other. This system allows ultimate versatility in controlling both light and privacy. You can mix and match fabrics to create a look that is unique. Multiple Double Roller Blinds can also be linked together to allow operation by a single chain and can also be motorised.

With a Double Roller Blind, a blackout fabric is positioned on one roller in front of a sunscreen or light-filtering fabric on a second roller.

# SUNSCREEN FABRIC

Sunscreen Fabric can be used to turn your blind into a sunscreen blind, filtering out harsh UV rays while keeping a view to the outside.

The following Wynstan Blinds can be made using Sunscreen fabric:

- Roman Blinds
- Roller Blinds
- Panel Glides

Sunscreen Fabrics work particularly well when used for blinds which are on windows facing the sun. They allow you to still see outside, and maintain a light and airy atmosphere, while cutting the sun and its UV rays dramatically.

Roller Blinds can be made in blackout, light-filtering or sunscreen fabric

# WHISPER CELLULAR SHADES

Whisper Cellular Shades are advanced cellular blinds that feature a unique cellular structure resembling honeycomb.

Air passing through the blinds gets trapped in the structure, which assists in noise reduction and aids in energy efficiency. The Whisper Cellular shades are perfect for unconventional windows as they can be manufactured in a number of different shapes.

Whisper Cellular Shades are also one of the few window coverings available which are specifically designed to cover skylights. Their highly versatile bottom-up and top-down functions allow you to enjoy your views while keeping your privacy intact. Whisper Cellular Shades are manufactured from a durable fabric, ideal for everyday use, yet fine enough to diffuse light into an ambient glow. The shades are operated manually by cord, or can be motorised.

A unique honeycomb structure saves energy by trapping air, making it easier to heat and cool your home.

Close-ups of Whisper Sheer Shades

# WHISPER SHEER SHADES

Whisper Sheer Shades combine the very best elements of blinds and curtains in one highly intelligent window covering.

Constructed with a series of tilting fabric vanes suspended between two layers of sheer fabric, Whisper Sheer Shades allow for control over the degree of light and privacy. When the vanes are open, they beautifully filter the light and almost disappear, allowing a clear view to the outside. When closed, the blind provides complete privacy, but without completely darkening the space.

The sheer polyester fabric is luxurious and delicate in appearance, yet durable enough for everyday use. Its anti-static nature helps repel dirt and dust. 50mm or 65mm vanes that are sandwiched between the two layers of fabric are available in translucent and room-darkening fabrics in a variety of fashionable colours. The headrail can be colour coordinated to discreetly conceal the blind when it is fully raised.

# VISION BLINDS

Vision Blinds combine the elegant light diffusion of sheer fabric with the stylish practicality of a Roller Blind.

The front layer moves independently of the back layer, allowing the stripes to glide between each other and giving you more control over the amount of light and degree of privacy.

With Vision Blinds, you'll be spoilt for choice with the contemporary colour and fabric palettes of statement stripes featuring a stunning range of dramatic metallic finishes, pretty sheers and natural woven effects. Vision Blinds roll up into an attractive cassette headrail featuring a matching fabric insert.

Close-ups  
of Vision  
Blinds

# PANEL GLIDES

Panel Glides are inspired by Asian design, with large panels and simplistic function, and will give your space a sleek and contemporary look.

This product is made up of a system of panels that are attached to a carrier running along a discreet track and allow for the optional addition of a fashionable pelmet.

Panel Glides can also be used as stylish room dividers, making them a fantastic alternative to traditional partitioning systems. They can also cover large openings such as doorways.

Close-up  
of Panel  
Glide Track

# VERTICAL DRAPES

Vertical Drapes are a popular choice due to their practical and versatile nature.

They function equally well over both windows and doors, allowing you to create consistency throughout your home. Vertical Drapes are available in three slat widths, and fabrics range from blackout to light filtering. Wynstan's three-weight program provides options for the method of weighting your Vertical Drapes. Choose between weights and chain, special weights or sewn in weights.

Tracks can be colour coordinated to match your chosen fabric. Vertical Drapes can also be further customised with a fabric insert or fashionable pelmet. Vertical Drapes can be operated by wand control or cord and chain control.

Timber Venetians

Timber Look Venetians

Aluminium Venetians

# VENETIAN BLINDS

Timber Venetian Blinds are a popular option as they work for any room and are easy to operate and maintain.

The slats can be positioned in such a way that the light is let in and prying eyes are kept out. Wynstan manufactures Timber Venetians in either lacquered cedar or painted basswood.

Timber Look Venetian Blinds provide the same look and feel as Timber Venetians but offer further advantages. In addition to being more economical, Timber Look Venetians are crafted from advanced materials which are more tolerant to moisture than Timber Venetians. This quality makes Timber Look Venetians ideal for kitchens, bathrooms and laundries. Venetians are operated by cord and wand, or can be motorised for added convenience.

Aluminium Venetian Blinds are highly practical and versatile. They are easy to use and allow great light and privacy control, and are available in three different slat widths. To ensure extra durability and strength, Wynstan aluminium slats are made thicker than market standards in order to ensure longevity. Colours range from pastels to vibrant metallic shades, allowing compatibility with any decor or style.

Straight Drop  
Awnings

# AWNINGS

WYNSTAN offers a wide range of awnings including Pivot Arm Awnings, Straight Drop Awnings and Canopy Awnings. Awnings are essential for the Australian lifestyle, making outdoor living spaces more comfortable by providing shade and sun protection.

Many Wynstan awnings can also be motorised, for the ultimate in luxury and convenience. Look for the 'Why not add Wynmotion' symbol to learn if a product can be motorised.

# FOLDING ARM AWNINGS

A Folding Arm Awning adds value to a home by allowing living space to be extended to the outdoors.

A Folding Arm Awning can be manufactured up to 7.1m in width, which means that large entertaining spaces can be covered. This Awning is streamlined and neat, free from vertical posts. Therefore, even when extended, people can walk beneath the Awning without any obstructing posts blocking their path. When retracted, the Awning sits neatly against the wall.

A Folding Arm Awning can be manufactured in two different styles:

- Standard: Ideal for placement under eaves and fitted with a factory adjusted pitch to provide maximum amount of shade.
- Fully Enclosed: When retracted, the fabric and mechanism are fully encased in the cassette, protecting the Awning from wind, sun and rain damage.

A Folding Arm Awning is operated by crank handle mechanism, or can be motorised.

Close-ups of  
Folding Arm  
Awnings

# PIVOT ARM AWNINGS

Pivot Arm Awnings operate on a pivoting arm which moves in an arc as it extends and retracts.

This provides a larger space between the Awning and the window, allowing for greater air circulation into your home.

Pivot Arm Awnings are operated by crank control or via a rope or tape which can be fed into your home, offering internal control. This is especially important on second storey or higher level installations. Pivot Arm Awnings can also be motorised.

Close-up of  
Pivot Arm  
Awning

# AUTOMATIC AWNINGS

An Automatic Awning is ideal for ground floor positions where the Awning needs to be installed close to the window in order to provide a high level of privacy and sun protection.

Close installation also reduces heat loss in winter and keeps your home cool in summer.

In strong winds, this clever Awning responds by retracting to protect the fabric from weather damage. The Awning can be manufactured up to 4000mm wide, allowing one blind to cover multiple windows.

A hood, available in a wide range of colours, adds a sleek quality and protects the fabric from weather damage when not in use. The self locking arms, which slide along guide rails, are simple to operate by hand or a pull stick.

Close-up of  
Automatic  
Awning

# STRAIGHT DROP AWNINGS

Straight Drop Awnings are vertical awnings which operate more like blinds, running perpendicular to the ground.

Straight Drop Awnings can be crafted in a range of styles, each with different technical properties. For instance, the Awning can utilise a hidden zip system, be guided along cables, or be loose at the sides and fasten at the base. With many styles and a wide range available, Straight Drop Awnings can be adapted to any area.

In particular, because they do not protrude, they are an ideal solution for the outside of windows which are next to fences or walkways. Straight Drop Awnings are also an excellent solution for the sides of roofed decks, verandahs or patios.

A range of fabrics are available for Straight Drop Awnings, ranging from colourful and patterned acrylic to canvas and clear PVC plastic. Sunscreen fabrics are also available, providing protection from the sun's harmful UV rays.

Straight Drop Awnings are a simple and stylish addition to have outside your home

# EUREKA CONSERVATORY AWNINGS

The Eureka Conservatory Awning is an elegant roof shading system designed to be fitted on the outside of both homes and commercial buildings, conservatory roofs, glass facades or windows.

It can be used as a retractable roof to cover outdoor entertaining areas. The Eureka Conservatory Awning is motorised so you can adjust the amount of sun protection with the touch of a button. Thanks to its unique tension system, high strength belts and mechanical tension springs, the Eureka Conservatory Awning is a versatile roof system that can be used all year round.

# FIXED STEEL AWNINGS

Fixed Steel Awnings are manufactured from tough COLORBOND® steel, providing your home with excellent protection from the rain and damaging UV rays.

Our COLORBOND® Steel Awnings can add great style and dimension to your home and are available in a combination of one to fourteen colours.

Steel Awnings are fixed to the wall, but the degree of slope can be anywhere from 15 to 45 degrees. If you require a large Awning, we recommend the use of support posts to further enhance stability.

# CANOPY AWNINGS

Canopy Awnings provide valuable cover and protection over your windows and doorways, adding great character to your home.

Wynstan can manufacture your Canopy Awning in a number of different styles such as curved or triangular, and with the bottom covered or uncovered. Wynstan also offers a great selection of fine fabrics to choose from, ensuring your Canopy Awning perfectly matches your home.

# WYNMOTION

Many WYNSTAN Blinds and Awnings can be motorised with Wynmotion, eliminating the need for cords or cranks and giving you the ultimate experience of convenience and luxury. Control your Blinds or Awnings with the touch of a button!

# WHY ADD WYNMOTION?

There's no time like the present to invest in future living.

Especially designed for a relaxed Australian lifestyle, Wynmotion motorised solutions means kissing cords and levers goodbye – and controlling your blinds and awnings at the touch of a button.

It's a hands-off approach that means the kids will no longer be tempted to get in a tangle, there's no back-wrenching cranking for you to do, and your windows enjoy a sleek, stylish motorised makeover.

Without the wear and tear of manual operation, blinds and awnings stay in better working order for longer. The more efficiently they work, the more you might save on heating and cooling bills.

A Wynmotion window covering system is designed to add effortless luxury to your home – not just today – but all your tomorrows as well.

Each one of our unique motors is lovingly engineered, painstakingly tested, then rigorously checked and re-checked to make sure it lives up to our exacting standards and your high expectations.

You can be confident that once a Wynmotion system is in your home, it's there for the long haul – as the 5-year warranty on every one of our motors proudly guarantees.

**SELF TIGHTENING OPTION**  
Greater level of wind control for straight drop awnings.

# SHUTTERS

WYNSTAN offers custom made Plantation Shutters, perfectly crafted to fit your home, as well as Aluminium Shutters that are excellent for exterior spaces.

---

**Colours and textures** are two of the most important decisions to make when you are designing your home.

Come and look through our range of fabrics to see which one matches the vision in your mind.

# PLANTATION SHUTTERS

Plantation Shutters are made from the finest basswood.

This stunning timber will transform the appearance of your home. We also craft Fauxwood Shutters for wet areas such as the kitchen, laundry and bathroom.

Louvres can be tilted to allow sunlight in, while keeping prying eyes out. Wynstan Shutters also have fantastic insulating properties, keeping your room warmer in winter and cooler in summer. This also helps reduce your heating and cooling costs.

A wide variety of colours and slat widths means that Shutters can be carefully tailored to fit your home. Shutters can be hinged, bi-fold or sliding, and therefore work effectively with almost any window. Shutters can even be made to fit round, arched or triangular shaped windows perfectly.

Close-up of Plantation shutters

With the blades open, Plantation Shutters still allow light to fill up the room

## ALUMINIUM SHUTTERS

Aluminium Shutters are the perfect outdoor solution, providing elegance and sophistication as well as being highly practical and functional by providing protection.

Aluminium Shutters can also be used indoors, but are particularly effective outdoors as they are incredibly durable and feature a high UV powder coated finish.

Aluminium Shutters can be hinged, fixed, bi-fold or sliding.

## DOORS, GRILLES & FLYSCREENS

WYNSTAN is a licensed retailer of Crimsafe® security doors and grilles. Wynstan offers a wide range of safety doors, grilles, flyscreens and retractable flyscreens.

With Crimsafe® installed you can enjoy the same fortified security, without the bars.

---

At Wynstan, we want to help  
you to take charge of your  
home and turn chaos into a  
sanctuary.

# CRIMSAFE® SECURITY

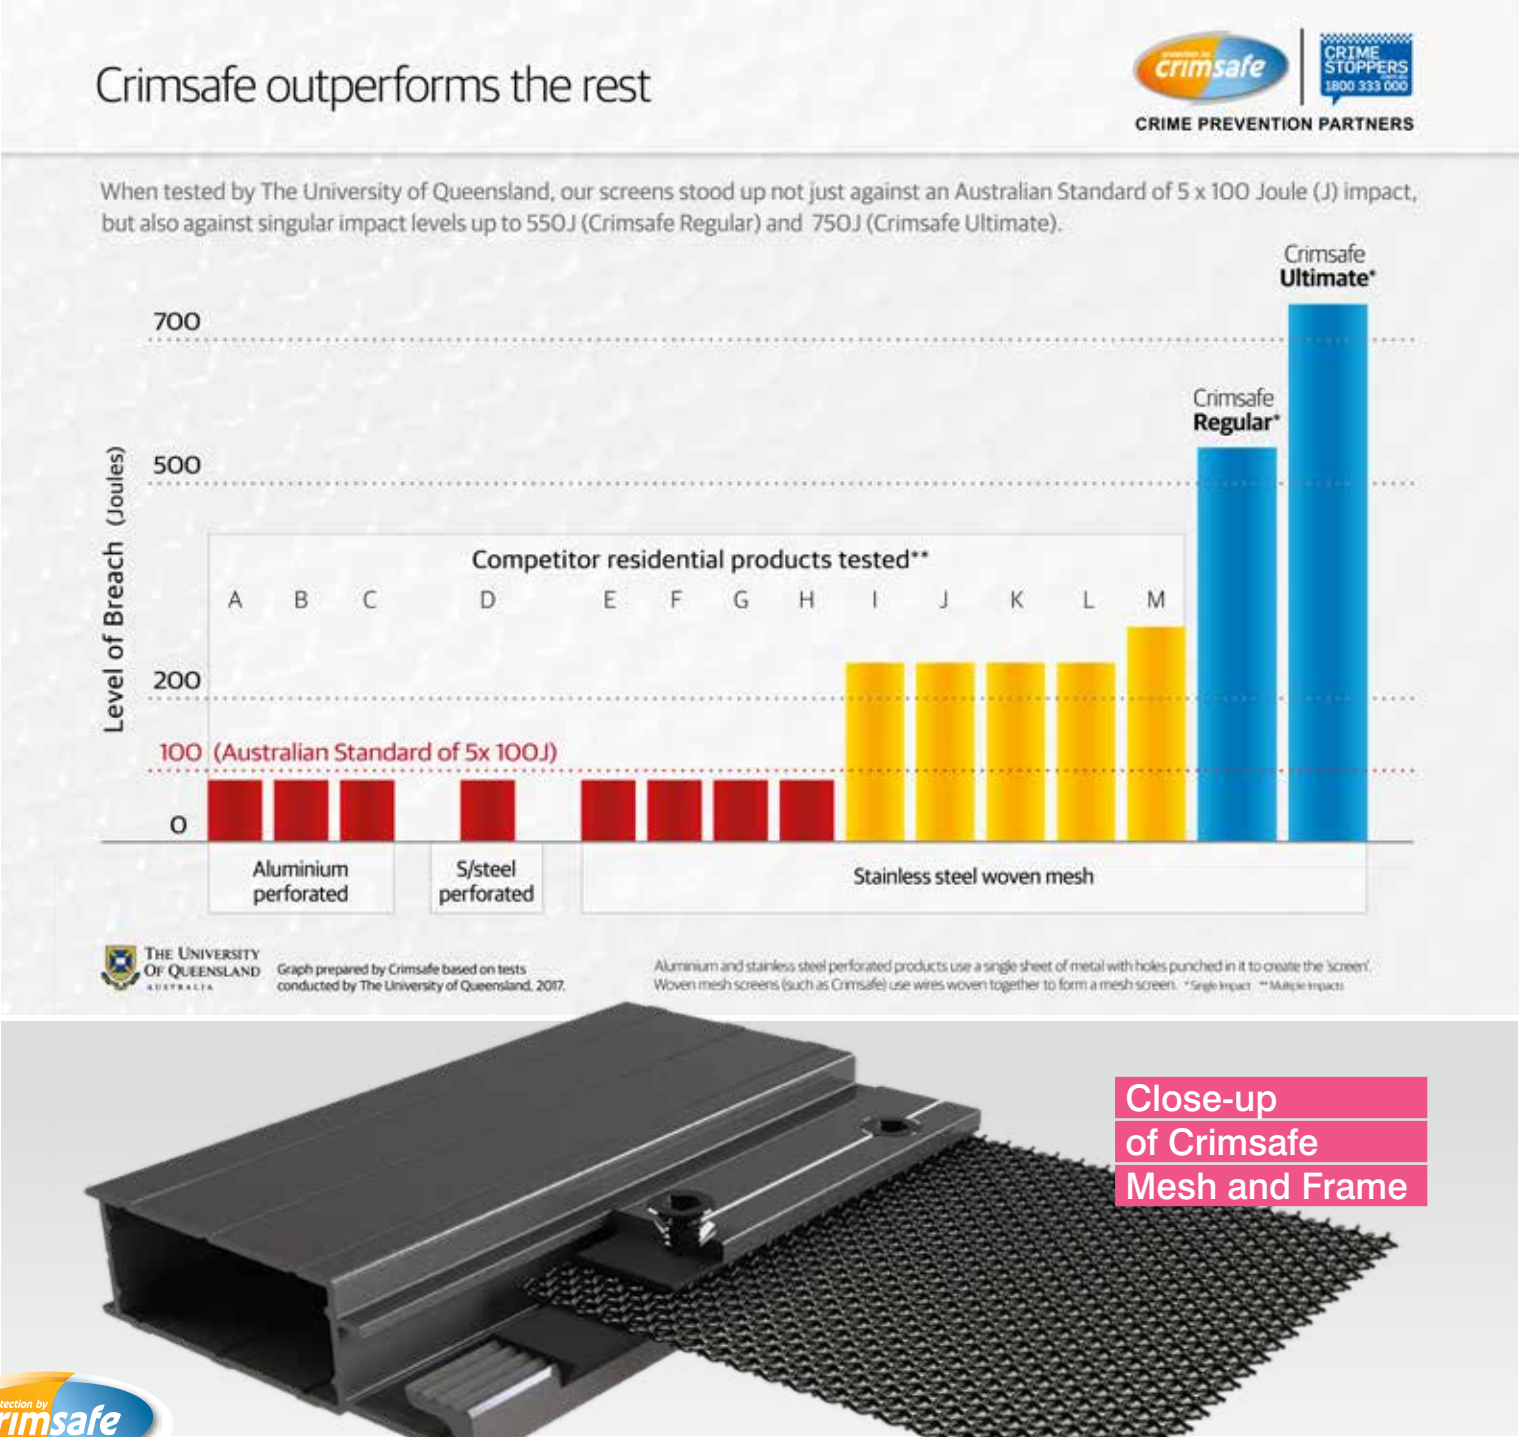

Keep your home secure with Crimsafe®, manufactured and installed by Wynstan, your local authorised licensee.

Unlike traditional security doors and grilles fitted with bars, Crimsafe® is a stylish product that will complement your decor. Most importantly, Crimsafe® cannot be effectively cut, pried open or kicked down, ensuring your home is secure.

Crimsafe® features a patented Security Mesh Clamp System. While inferior products glue or wedge mesh into a frame, Crimsafe® sandwiches Tensile-Tuff® Security mesh between two serrated pieces of aluminium, and then screws this mesh into place. This results in a strong, vice-like grip which has a much stronger tolerance to force than many competing products.

Crimsafe® is constructed from 304 Grade Stainless Steel, which is much stronger than other security mesh products made with only 316 Marine Steel. Crimsafe® Tensile-Tuff® Security mesh is also 26.5% thicker than other products.

In the event of a fire, Crimsafe® can help reduce the level of radiant heat entering your home. Crimsafe® Screens achieved a 45% rating for attenuation of radiant heat flux. This means that almost half the heat from a fire source on the other side of a screen does not transfer through the Crimsafe® Tensile Tuff® Security mesh.

Crimsafe  
Hinged Door

Crimsafe  
Bi-fold Door

Crimsafe  
Sliding Door

# CRIMSAFE® DOORS

Crimsafe® Doors can be hinged, folding or bi-fold, meaning there is a Crimsafe® solution for almost any doorway.

Crimsafe® Doors feature Crimsafe's® unique Security Mesh Clamp System and 304 Grade Stainless Steel mesh. Crimsafe® doors also work as flyscreens, yet do not prevent airflow, ensuring that breezes are allowed in, while bugs are kept out!

The frame of a Crimsafe® Door can be made in a variety of different colours, as well as various wood-grain styles, giving the look of real timber.

All Crimsafe® Doors come fitted with a triple lock, which is crafted from stainless steel for superior strength and meets all Australian quality standards. For extra security, mid-rails can come standard with your Crimsafe® Doors. Mid-rails may help strengthen the resistance of your door's lock against a jemmy attack and protect the hinges by reducing an intruder's ability to lever it from the wall.

Crimsafe® Bi-fold Doors are a particularly popular option and are perfectly suited to the indoor/outdoor nature of Australian living, neatly folding to the side when not in use.

# CRIMSAFE® ULTIMATE

With Crimsafe® Ultimate, an even greater level of strength and security is achieved.

Crimsafe® Ultimate is seven times stronger than the impact level required by Australian standards and 40% stronger than regular Crimsafe®. Crimsafe® Ultimate features tamper-resistant screws which bind the Screw-Clamp, mesh and frame together, making a tightly integrated system which ensures greater security.

Extra security cover

Crimsafe Ultimate Bi-fold Doors

Crimsafe Ultimate Door

# CRIMSAFE® GRILLES

Ensure your home is protected with Crimsafe® Grilles.

These fixed window grilles can be face-fitted, reveal-fitted using an angled frame, or fixed in a flyscreen track. Crimsafe® Grilles work with windows of various types including Louvres, Double Hung and Sliding Windows.

Crimsafe® Grilles feature Crimsafe® Tensile-Tuff® Security Mesh, which is made of 304 Grade Stainless Steel, offering premium strength. Crimsafe® Grilles also feature Crimsafe's® Mesh Camp System. This contributes to the product's incredible strength and eliminates the need for unsightly bars.

Crimsafe® Grilles also offer superior heat control. When applied over the whole area of a single glazed window, a Crimsafe® Grille will improve the window's 'Solar Heat Gain Coefficient' by up to 53%. Crimsafe® Grilles are custom manufactured to perfectly fit your window, ensuring a clean finish and excellent protection.

Crimsafe  
Grilles

Crimsafe  
Safe-S-Cape

Close-up  
from inside  
Safe-S-Cape

# CRIMSAFE® SAFE-S-CAPE®

With Crimsafe® Ultimate, an even greater level of strength and security is achieved.

In an emergency, you need to evacuate your home in a matter of seconds and trying to get through a standard Crimsafe® window grille is difficult. The Safe-S-Scape® range features a keyless emergency exit function, specifically developed for such times.

Crimsafe® Safe-S-Capes® can be hinged at the top or sides and be made to swing outward or inward. This makes them suitable for a wide range of spaces.

Casting Hinged  
Safety Door

Diamond  
Safety Grilles

Diamond  
Safety Door

# SAFETY DOORS AND GRILLES

Wynstan Safety Doors and Grilles create extra safety while also keeping those pesky insects outside where they belong.

Safety Doors are available in a hinged or sliding design and, for extra peace of mind, can be fitted with a triple lock system.

We can match your door to your existing door frame and we offer a wide colour range. Mesh options include fibreglass, aluminium or for a greater level of fire resistance, stainless steel.

One way vision mesh is ideal for maintaining your views whilst keeping your privacy, and our paw proof mesh with an optional doggy door will ensure the whole family is happy. There is also the option of matching side lights for your doors. By fitting your windows and doors with our matching safety range, you can create a sleek, uniformed look.

# WYNSTAN FLYSCREENS

Flyscreens are an affordable and effective solution to pesky, germ carrying insects entering your home.

Wynstan Flyscreen frames can be 9mm or 11mm in thickness and can be powder coated to match your window frames. Choose between fibre glass mesh or, for a greater level of fire resistance, stainless steel mesh.

Wynstan Flyscreens can also be designed to meet the bushfire regulations of your local area. Get your Wynstan Flyscreens today so you and your family can enjoy lovely fresh air in peace.

## RETRACTABLE FLYSCREENS

Retractable Flyscreens offer all the benefits of a regular flyscreen, with the added benefit of being able to retract.

The Retractable Flyscreen can be made with a Rollaway (retract to the side) or Rollup (retract to the top) system.

Extra stopping points can be added to the track, to allow the screen to be secured at various points. Wynstan offers Retractable

Flyscreen solutions for all types of windows and doors including sliding, double hung, louvre, casement, awning windows or bi-fold doors.

Choose between plain or striped mesh. For Rollaway Retractable Flyscreens, there is also the option of pleated mesh.

## FAMILY AT THE HEART OF WYNSTAN

Having lost Margaret Turner, the matriarch of the Wynstan family to Ovarian Cancer at Christmas in 1994, the

Wynstan family know the devastating impact this disease can have. You can lose a mother, a wife, a partner, a grandmother or a friend.

Wynstan has partnered with Ovarian Cancer Australia to increase awareness of this illness, while offering financial support to help continue research into Australian women living with Ovarian Cancer. The sole aim is change, so that others don't have to share the same fate as the Wynstan family.
