

## PERFECT FOR ANY WINDOW

Suitable for windows of all shapes and sizes, Honeycomb Shades are advanced pleated blinds that feature a unique honeycomb structure resembling honeycomb. Air passing through the blinds gets trapped in the structure, assisting in noise reduction and aiding in energy efficiency. Honeycomb Shades are also one of the few window coverings available which can be specifically designed to cover skylights.

# TECHNICAL INFORMATION

## Energy Efficiency

Achieve energy savings with Honeycomb Shades 20mm single cell blackout fabric.

## Colour and fabric

Choose from over 100 colours and designs in the Honeycomb Shades fabric range, with colour-coordinated hardware to match.

## Skylights

Honeycomb Shades are one of the few products that work effectively in skylights, offering options to block out or filter light.

## Sizing

Honeycomb Shades are available in various cell sizes: 10mm, 15mm, 20mm and double cell, allowing you to choose based on your desired look and energy efficiency needs.

## Flexibility

The Honeycomb Shades operating system offers versatile light and privacy options. With the Top Down Bottom Up (TDBU) feature, you can lower the top while keeping the bottom closed.

## Size Limitation

The size limitations vary depending on the fabric and operating system. The following details are based on the standard cord system.

Min Width	Min Drop	Max Width	Max Drop
200mm	300mm	3000mm	3600mm

# BENEFITS

## Energy Saving

The unique honeycomb structure traps air, enhancing energy efficiency by making it easier to heat and cool your home. Cellular Shades offer the highest insulation among all soft window furnishing products.

## Minimal light gap

Wynstan Honeycomb Shades fit precisely within a reveal, leaving only a minimal 3mm light gap on each side.

## Sleek stacking system

When pulled right up, the stack is very small (Average 2.3% of fabric height) and does not obstruct views.

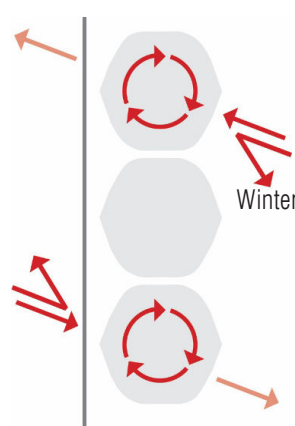

## Dual Light shade option

This option provides ultimate flexibility by using both light-filtering and blackout fabrics. This option has two layers, by moving the mid rail, you can switch between them or position the mid rail anywhere to have a mix of both.

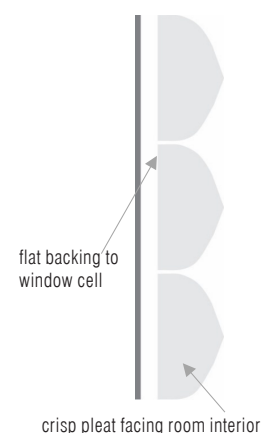

## Unique D-Cell design

Dust resistant fabrics provide easy maintenance and fabrics constructed with the unique D-Cell design ensures pleat retention over many years.

### Energy Efficiency

### D-Cell Fabric

## Small Headbox

The smallest headbox requires just 36mm of width for installation, making it ideal for tight spaces.

## Easy to clean

Crafted from anti-static, non-woven polyester, Honeycomb Shades are easy to clean and maintain.

## Satisfaction Guaranteed

Quality installation is assured with our specialist team, and peace of mind with a Wynstan 3 year warranty.\*\*
