Wynstan is a trusted Australian brand known for quality window furnishings and security solutions. We believe every home deserves comfort, privacy, style. From blinds and shutters to awnings and Crimsafe our products are custom-made to suit your home and lifestyle, bringing you quality you can see and trust.

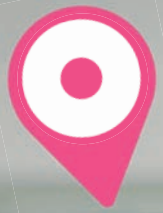

PROUDLY AUSTRALIAN MADE

Wynstan has been making Australian homes better since 1968. What started as a small operation in Burwood has grown into one of Australia's most trusted names in blinds, doors, shutters and awnings - and we still manufacture right here!

Our products are custom-made at our own factory in Yennora, NSW. That means real control over quality, real precision in the fit, and over 350 Australians coming to work for us every day. When you choose Wynstan, you're choosing something built locally, installed by experts, and backed by over 57 years of getting it right.

STEP 4

Professional Installation

Our team installs everything properly, on time. You don't have to lift a finger.

BLINDS

Beautifully streamlined and super stylish, Wynstan's range of blinds cover all tastes, styles and budgets – and are proudly made right here in Australia.

Roller Blinds
Siesta Blinds System
Roman Blinds
Honeycomb Shades
Vision Blinds
Vertical Blinds
Panel Glides
Venetian Blinds

ROLLER BLINDS

Create a sleek, modern look with a practical Roller Blind. Roller Blinds are neat and discreet when pulled up, and stylish when down.

Wynstan offers an extensive range of quality fabrics in a number of colours, patterns and textures to suit Roller Blinds. Blockout fabrics are great for bedrooms while sheer and translucent fabrics are ideally suited to living areas, you can even pair these with curtains too!

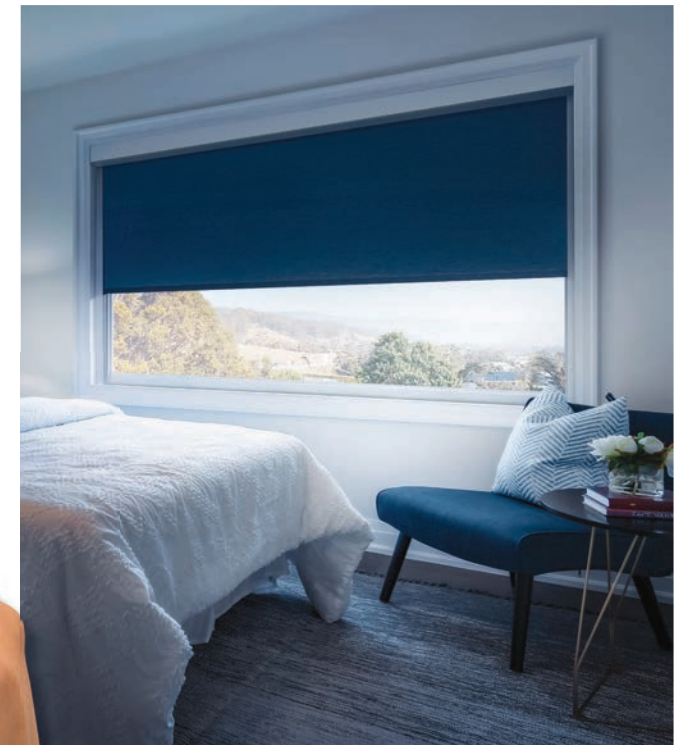

Side
channels
blockout
light.

SIESTA BLIND SYSTEM

The perfect sleep starts with a dark space and our Siesta Blind System is the number one choice for blocking external light day or night.

Wynstan's Siesta Blind System ensures ultimate privacy by blocking light from entering the room with its unique channel and headbox system.

A popular option for shift workers requiring a dark space to sleep during the day, nurseries, media/AV rooms or even for those who just love a sleep in!

ROMAN BLINDS

Roman blinds fold neatly as they rise, creating a clean, structured look that works in almost any room.

They're a practical choice for living areas, bedrooms, and bay windows - and because every blind is custom-made to your exact measurements, they fit like they were always meant to be there.

Choose from blackout, sheer, and translucent fabrics across a wide range of colours, patterns, and textures. Roman blinds can be operated by cord or chain, or motorised with Wynmotion for added convenience.

Dual Light - sheer fabric
for daytime, blackout
for night. One shade,
full control.

HONEYCOMB SHADES

These advanced Honeycomb Shades feature a unique cellular structure resembling honeycomb.

Air passing through the blinds gets trapped in the structure, which assists in noise reduction and energy efficiency. Honeycomb Shades can be customised for unique window shapes, including skylights. Their highly versatile bottom-up and top-down functions allow you to enjoy views while maintaining privacy. Honeycomb Shades are manufactured from a durable fabric, ideal for everyday use, yet fine enough to diffuse light into an ambient glow. The shades are operated manually by cord, or can be motorised.

A unique honeycomb structure saves energy by trapping air, making it easier to heat and cool your home.

VISION BLINDS

Vision Blinds add an elegant light diffusion of sheer fabric with the stylish practicality of a roller.

The front layer moves independently of the back layer, allowing the stripes to glide between each other and giving you more control over light and privacy. We offer a range of contemporary colours and fabric palettes of statement stripes, including dramatic metallic finishes, pretty sheers and natural woven effects.

Clean lines and elegant textures.

VERTICAL BLINDS

A classic choice of window covering, Vertical Blinds are popular because they are practical and versatile.

Suitable for both windows and doors, they allow you to create consistency throughout your home. Vertical Blinds are available in three slat widths, and fabrics range from blackout to translucent. Wynstan's three-weight program allows you to choose between weights and chain, special weights or sewn in weights.

Tracks can be colour coordinated to match your chosen fabric and blinds can also be further customised with a fabric insert or fabric pelmet. Vertical Blinds can be operated by wand control or cord and chain control.

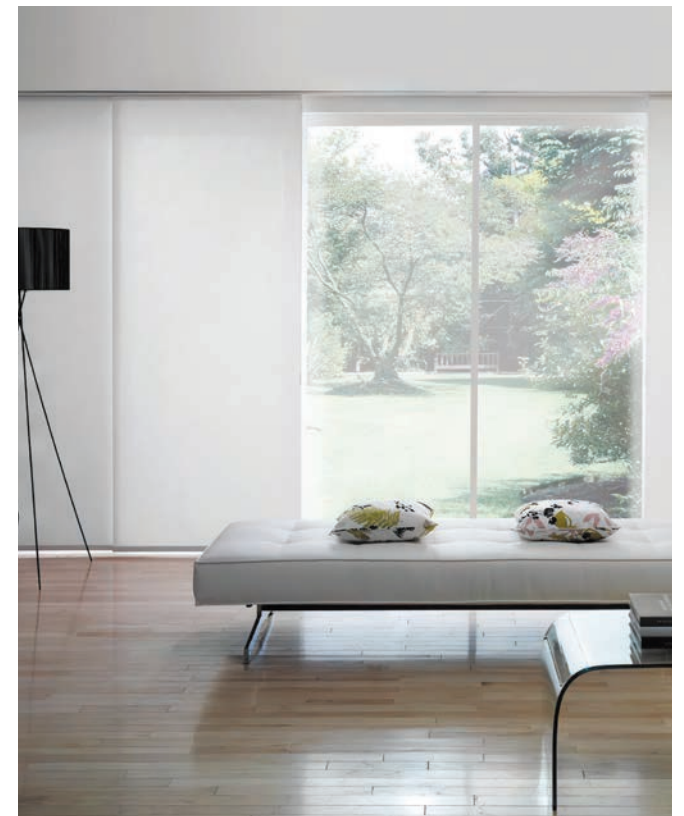

Perfect
in front of
sliding doors

PANEL GLIDES

Inspired by Asian designs, with large panels and simplistic functions, Panel Glides give any space a sleek and contemporary look.

This is a system of panels attached to a carrier running along a discreet track, which allows for the optional addition of a fashionable pelmet. Panel Glides can also be used as stylish room dividers, making them a beautiful alternative to traditional partitioning systems. They can also cover large openings and come in our convenient wand control system.

VENETIAN BLINDS

Venetian Blinds are designed to welcome in light, provide a high level of privacy and effectively moderate air flow.

With various materials, operative methods, colours and slat sizes to choose from this style of furnishing is everlasting for aesthetics and functionality. Wynstan offers 3 options in our range:

- **Timber – Cedar or Basswood**
- **Timber-look**
- **Aluminium**

Our Timber Venetian options include lacquered cedar or painted basswood while our Timber-look venetians are perfect for wet spaces such as bathrooms and kitchens because of their superior moisture tolerance.

Aluminium Venetian Blinds by Wynstan are made thicker than market standards for extra durability and strength with an extensive colour range including pastels and metallic shades.

Blockout

Translucent

Sheer/Sunscreen

OPACITY

LIGHT CONTROL

The most important factor for many people when selecting blinds is light control.

A good blind will block or filter the light perfectly according to the style and purpose of the room. At Wynstan we have three opacity options when it comes to selecting blind fabrics. Here's a guide so you choose the one for you:

BLOCKOUT

Blockout fabrics are perfect for privacy and complete light control. This type of fabric allows you to entirely blockout the outside light, as well as providing total privacy. They are best suited to rooms where complete light screening is top priority, such as a bedroom or media room.

TRANSLUCENT

This type of fabric softens harsh light, while providing daytime privacy. Translucent fabric allows natural illumination, creating a beautiful ambience. This fabric is perfect for kitchens and family rooms.

SHEER/SUNSCREEN

Sheer fabrics allow light to be diffused, while allowing you to enjoy the view. This is designed to stop glare but allow light in, where visibility is important.

KIDS COLLECTION & CHILD SAFETY

We have created a fun and unique fabric collection all for Kids. 'Y' not transform your kids' room to a wonderful escape where their imaginations can run wild!

Whether you're creating a dinosaur or woodland oasis, want something unisex for a new baby on the way, or a glow-in-the-dark feature, we've got you covered. Our Kids Collection also includes various blackout fabrics to keep the daylight out when your little one needs to sleep.

Wynstan takes its child care safety responsibilities very seriously. When blind cords are too long or end in a loop, children can quickly become entangled in the cord, potentially strangling the child. This is why we always fit a child safety device on every cord operated product. Alternatively you can motorise your blinds, and eliminate the cords all together. You may just need to hide the remote!

Closeup of our child safety device.

CURTAINS

Frame the view outside whilst creating a beautiful indoor space using our curtains to create soft flowing lines and smooth complementing colours.

Sheer Curtains
Blockout Curtains
Veri-Shades®
Curtains & Blinds Combined

SHEER CURTAINS

Sheer curtains let natural light in while softening glare and giving you a sense of privacy during the day.

They work beautifully in open-plan living areas, dining rooms, and anywhere you want to keep the connection to outside without feeling exposed. Layer them with a blockout blind or curtain for full light control day and night.

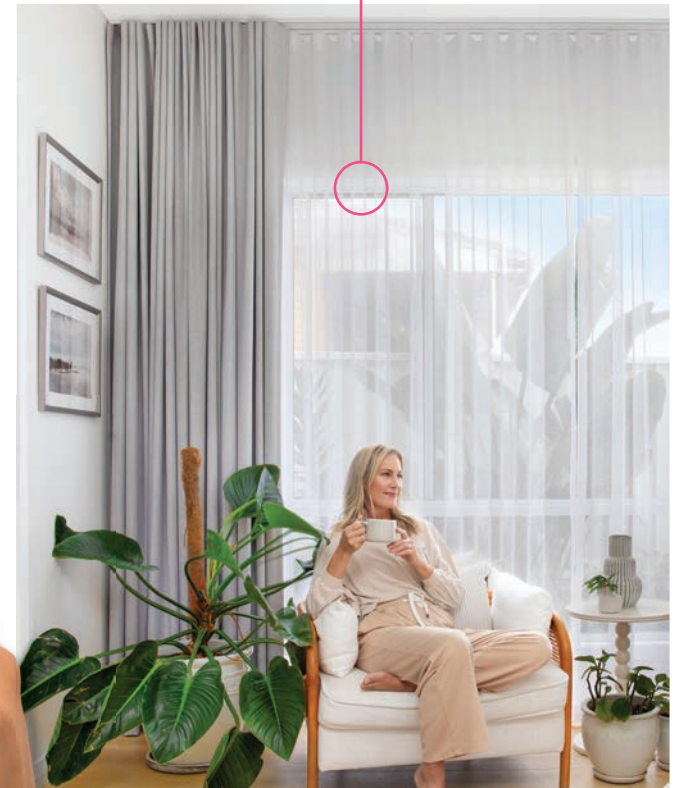

Blocks light and reduces noise, ideal for bedrooms and kids' rooms

BLOCKOUT CURTAINS

Blockout curtains do exactly what the name suggests - keep the light out and the noise down.

They're the practical choice for bedrooms where sleep quality matters, kids' rooms, and anywhere you want real privacy after dark. Layer them with a sheer curtain for the best of both worlds - soft filtered light during the day, complete darkness at night.

Pair with a sheer for daytime light and full night privacy.

VERI SHADES®

These beautiful curved fabric vanes contain a unique patented design that has the elegance and functionality of a blind and the privacy of a curtain.

With the turn of a wand you can easily adjust the Veri Shades® to control and adjust light levels, depending on the position of the sun, or privacy required. Ideal for modern indoor-outdoor living spaces, you can walk through the individual fabric vanes whether they are opened or closed.

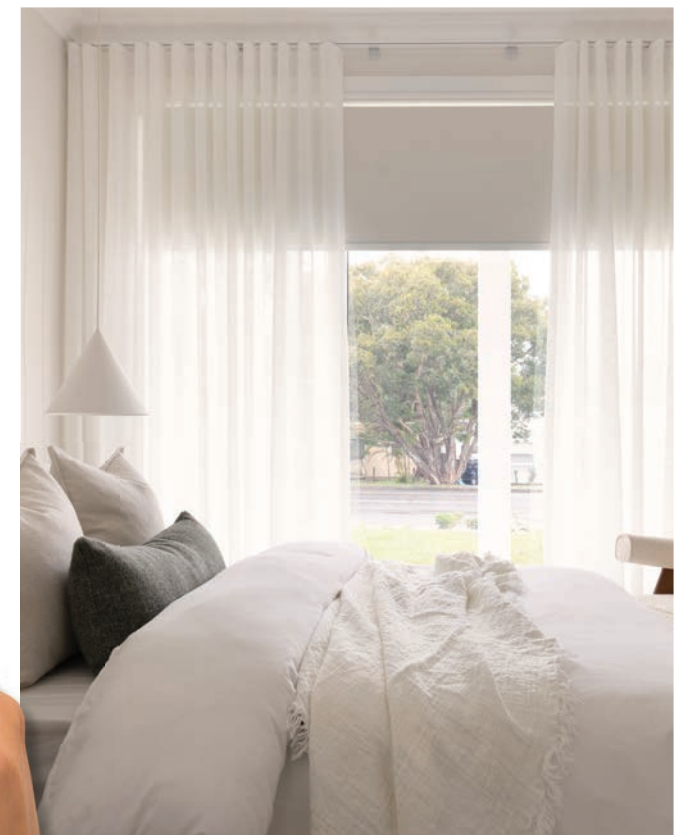

THE BEST OF BOTH

Sheer curtains and blackout rollers - together

A sheer curtain during the day lets light in and keeps the room feeling open. A blackout roller behind it handles complete darkness when you need it. Two products, one window, full control.

It's one of the most practical combinations in the range and your consultant will bring samples of both to your home so you can see exactly how they work together before you decide.

AWNINGS

Essential for Australia's love of outdoor entertaining, outdoor blinds and awnings make alfresco spaces more comfortable and stylish by providing protection from the sun as well as added personality to exterior facades.

Outdoor Blinds Overhead Shade

Folding Arm Awnings
Eureka Conservatory Awnings

Angled Shade

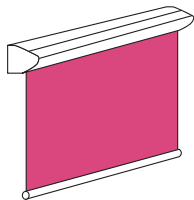

Retractable Automatic Awnings
Pivot Arm Awnings

Fixed Shade

Fixed Steel Awnings
Canopy Awnings

STRAIGHT DROP OUTDOOR BLINDS

A simple and stylish addition to the outside of your home, Straight Drop Outdoor Blinds operate like Roller Blinds, running perpendicular to the ground.

- **Zip Style**
- **Cable Guide**
- **Straight Drop**

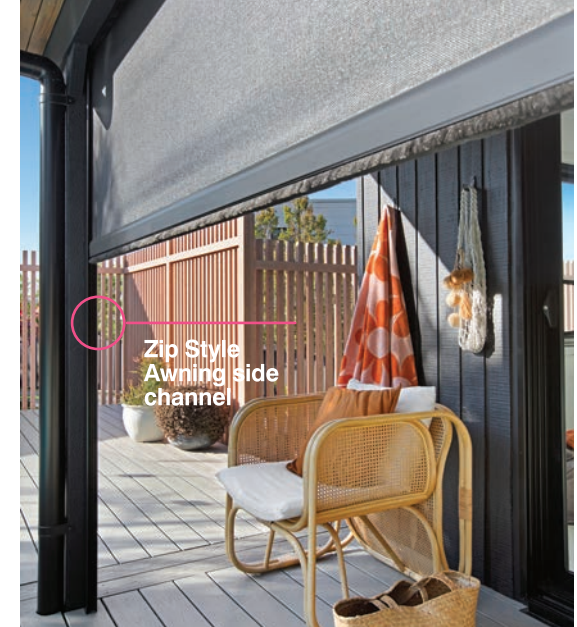

They can be created in a range of styles, each with different technical properties. For instance, the Outdoor Blind can utilise a hidden zip system, be guided along cables, or be loose at the sides and fasten at the base.

With many styles and a wide range available, Straight Drop Outdoor Blinds are highly adaptable to your needs. Because they do not protrude, they are an ideal solution for the outside of windows that are next to fences or walkways. They are also an excellent solution for the sides of roofed decks, verandahs or patios.

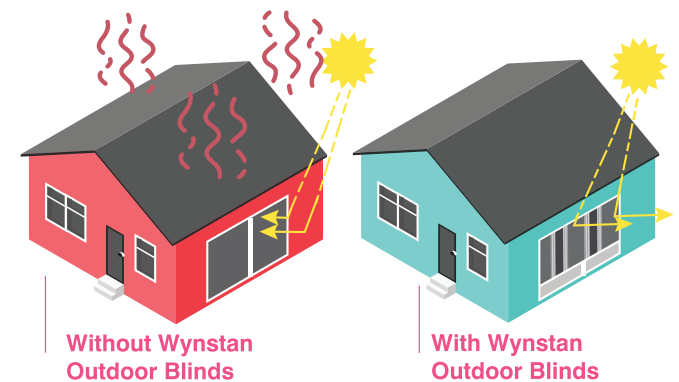

A range of fabrics are available for Straight Drop Outdoor Blinds, from colourful acrylic designs to canvas and clear PVC plastic.

The Cable Guide style is great for windy environments.

Outdoor Blinds

With Wynstan
Outdoor Blinds

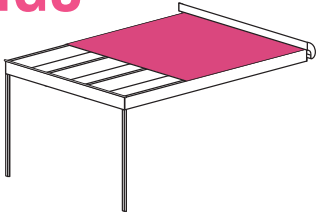

Straight Drop Outdoor Blinds are a great way to cool your home from the outside in!

Wynstan Straight Drop Outdoor Blinds are proven to reduce cooling energy costs by up to 44%. Our Outdoor Blinds have been independently tested & proven to significantly reduce cooling energy costs by keeping a standard* home at a consistent & comfortable temperature throughout the summer months.

*Results based on a single storey, brick veneer home on a concrete slab using ducted air-conditioning and equally distributed windows with Wynstan Awnings installed with Canvas fabric. Based on independent modelling conducted by White Box Technologies in conjunction with Peter Lyons & Associates June 2013.

OVERHEAD SHADE - EUREKA CONSERVATORY AWNINGS

These sleek and modern awnings are designed to be fitted on the outside of homes and commercial buildings, conservatory roofs, glass facades or windows.

This elegant roof shading system can be used as a retractable roof to cover outdoor entertaining areas.

Practicality wins here because the Eureka Conservatory Awning is motorised so you can adjust the amount of sun protection with the touch of a button.

OVERHEAD SHADE - FOLDING ARM AWNINGS

Extend your living space & enjoy shade on demand with one of our stunning Folding Arm Awnings.

A Folding Arm Awning can be manufactured up to 7.1m in width, which can cover large entertaining spaces. Streamlined overhead, Folding Arm Awnings allow people to walk beneath the awning without any obstructing posts when extended or closed. When retracted, the awning sits neatly against the wall. A Folding Arm Awning can be manufactured in two different styles:

- **Semi Cassette:** ideal for placement under eaves and fitted with a factory adjusted pitch to provide maximum amount of shade. Can be operated by crank handle mechanism, or can be motorised.
- **Cassette:** only when retracted, the fabric and mechanism are fully encased in a cassette, protecting the awning from wind, sun and rain damage when closed. Motorised operation.

Full Cassette -
Closed

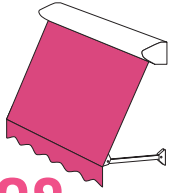

Semi Cassette - Closed

Full Cassette - Closed

ANGLED SHADE RETRACTABLE AUTOMATIC AWNINGS

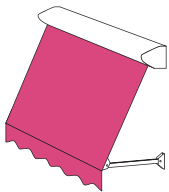

Ideal for ground floor locations, Retractable Automatic Awnings can be installed close to the window in order to provide a high level of privacy and sun protection.

This style of installation is energy-efficient, reducing heat loss in winter and keeping your home cool in summer. It is perfect for exposed locations as it responds to strong winds by retracting to protect the fabric from weather damage. The awning can be manufactured up to 4m wide, allowing one blind to cover multiple windows.

Choose hoods from a wide range of colours, which add a sleek quality and protect the fabric from weather damage when not in use. The self-locking arms, which slide along guide rails, are simple to operate by hand or a pull stick.

PIVOT ARM AWNINGS

Classical in style, but modern in functionality, Pivot Arm Awnings operate on a pivoting arm, which moves in an arc as it extends and retracts.

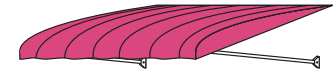

This style of awning provides a larger space between the awning and the window, allowing for greater air circulation inside your home.

Pivot Arm Awnings are operated by crank control or via a rope or tape, which can be fed into your home, offering internal control, which is especially important on second storey or higher-level installations. They can also be motorised for hard to reach locations.

FIXED SHADE - FIXED STEEL AWNINGS

Tough, durable and economical, Fixed Steel Awnings are manufactured from tough COLORBOND® steel, providing your home with excellent protection from the rain and damaging UV rays.

These classic awnings can add great style and dimension to your home and are available in a combination of colours. Steel Awnings are fixed to the wall, but the degree of slope can be anywhere from 15 to 45 degrees. If you require a large awning, we recommend the use of support posts to further enhance stability.

FIXED SHADE - CANOPY AWNINGS

Full of traditional charm, Canopy Awnings provide valuable cover and protection over windows and doorways, while adding character to your home.

Our designs are incredibly versatile and Wynstan can manufacture your Canopy Awning in styles that include curved or triangular shapes, and with the bottom covered or uncovered. We also offer a great selection of fabrics to choose from, ensuring the awning matches your home's aesthetic.

WYNMOTION MOTORISATION

Wynmotion is Wynstan's own motorisation system - compatible with most blinds, curtains, and awnings. No cords, no cranks, no fuss. Control everything from your phone, a remote, or by voice with Google Home and Amazon Alexa. Set schedules, adjust on the fly, or just press a button.

MOTORISE WITH WYNMOTION

There's no time like now to invest in the future.

Think about the windows you never bother with because they're awkward to reach. The awning that stays half-closed because the crank is a hassle. The blind cord the kids keep pulling. Wynmotion takes all of that off your plate. Set a schedule, use your phone, or just ask Google. It runs quietly in the background so you don't have to think about it.

IS WYNMOTION FOR YOU?

SHUTTERS

Always on trend and with quality in mind, Wynstan offers beautifully elegant custom-made Plantation Shutters, perfectly crafted to fit your home, as well as Aluminium Shutters and Roller Shutters designed for exterior spaces.

Plantation Shutters
Aluminium Shutters
Roller Shutters

PLANTATION SHUTTERS

Our elegant Plantation Shutters are a timeless addition to your home and are available in four materials -

- Fauxwood
- Hardwood
- Basswood
- Australis

With excellent thermal resistance, Plantation Shutters not only keep you cool during the summer, but help retain heat during the winter. Wynstan's Plantation Shutters are easy to clean and virtually maintenance-free – excellent for dust allergy sufferers and wet areas like the kitchen and bathroom.

Customisable in both shape and colour!

Adjustable
louvres allow
full light
control

Plantation Shutters are a timeless addition to your home. They provide the ultimate light control – each panel can be independently

adjusted to temper the light and control privacy. Also available in custom shape, colour and bi-fold solutions too!

ALUMINIUM SHUTTERS

The perfect outdoor solution, Aluminium Shutters provide understated style and sophistication as well as practicality.

Aluminium Shutters can also be used indoors, but are particularly effective outdoors as they are incredibly durable and feature a high UV powder-coated finish. Aluminium Shutters can be hinged, fixed, bi-fold or sliding.

ROLLER SHUTTERS

The Perfect Blend of Security, Weather Protection, and Year-Round Comfort.

Wynstan Roller Shutters are expertly designed to safeguard your home with enhanced security, superior weather protection, and exceptional insulation. Built with robust materials and sleek functionality, they provide peace of mind, energy efficiency, and year-round comfort. With their streamlined design and easy operation, our Roller Shutters deliver ultimate control, enriching your privacy and creating a tranquil living environment.

SECURITY DOORS, SCREENS & FLYSCREENS

—

Crimsafe® Security Doors
Crimsafe® Security Windows
Flyscreen Solutions
Safety Doors and Windows

THE STRONGEST SECURITY SCREEN ON THE MARKET

If it's not Crimsafe...It's not Crim Safe.

Crimsafe stainless steel security screens are independently tested to withstand up to 750 Joules of impact — seven times stronger than the Australian Standard. Most competitor screens don't get close. Wynstan is Australia's largest manufacturer and installer of Crimsafe, so you're getting the real thing, fitted properly, backed by people who know it inside out.

Tensile-Tuff® stainless steel mesh 26.5% thicker than standard mesh on the market. Woven — not punched — so impact force spreads across the whole screen rather than one weak point.

Lockwood triple locking Every Crimsafe door is fitted with Lockwood locks — securing at the top, middle, and bottom. Three locking points instead of one.

Screw-Clamp™ technology The mesh is mechanically clamped into the frame. On impact it grips tighter, not looser.

CRIMSAFE® ENTRY SECURITY DOORS

A Crimsafe door for every opening.

Crimsafe doors are available in four configurations - hinged, sliding, bi-fold, and French - so there's an option that works with how your home is built. Every door uses the same Tensile-Tuff® stainless steel mesh and Screw-Clamp™ technology, and every door comes fitted with Lockwood triple locking as standard. Every Crimsafe door also works as a flyscreen — so you get security and fresh air in one. Frames come in a wide range of colours and timber-look finishes. The door looks like it belongs - not like an afterthought.

Available in:

- Hinged
- Sliding
- Bi-Fold
- French / Double

ASSA ABLOY

For ultimate peace of mind, we fit every Crimsafe Door with top-quality Lockwood locks.

Digital Lockwood triple locking - keypad and fingerprint entry. No keys needed.

Triple Locking Handle Entry

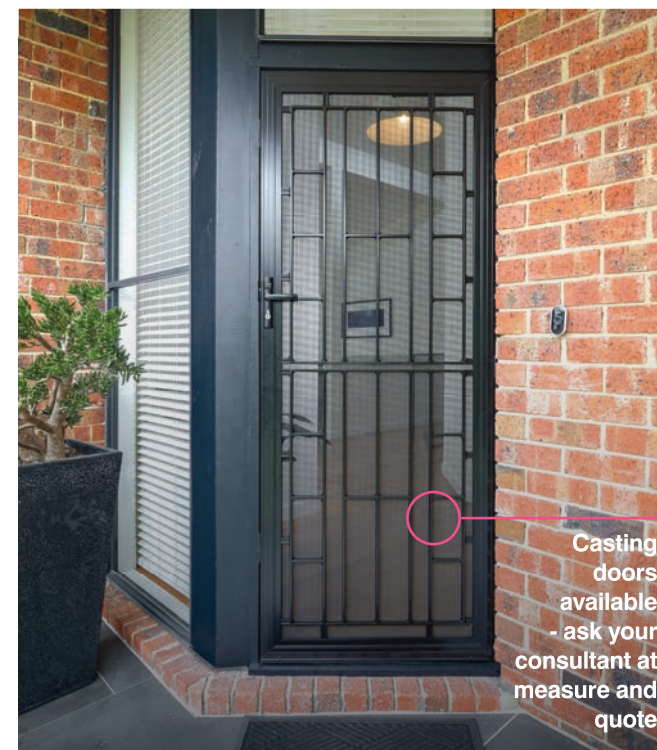

Security never looked so good!

CRIMSAFE® HINGED DOORS

A hinged Crimsafe door fits where your existing door fits. Same frame, same opening - with 304 grade stainless steel mesh and the strength to withstand up to 750 Joules of impact behind it.

Available in a wide range of colours and timber-look finishes, so it looks like it was always meant to be there. For homes in bushfire-prone areas, Crimsafe also reduces radiant heat entry by up to 45%.

CRIMSAFE® SLIDING DOORS

Available
for Double
Sliding &
Stacker
Doors

Lockwood Triple Locking:
Secures at the top,
middle, and bottom for
unbeatable protection.

Midrails:
Enhance
strength

Premium level 304
structural-grade
Tensile-Tuff™ mesh &
Screw-Clamp Technology

CRIMSAFE® BI-FOLD

Crimsafe® Bi-Fold Doors are a popular option with contemporary homes and are perfectly suited to the indoor-outdoor nature of Australian living, neatly folding to the side when not in use.

CRIMSAFE® FRENCH DOORS

Got a double door opening? Crimsafe is custom-made to fit it exactly - same mesh, same triple locking, same protection as every other Crimsafe door. Open both sides and let the air through without a second thought.

Extra security cover for a clean aesthetic finish.

Crimsafe® Ultimate Bi-fold Doors

Keyless
emergency exit
- releases from
the inside in
seconds

CRIMSAFE® SAFE-S-CAPE®

A Crimsafe screen that opens from the inside
- no key needed.

The Crimsafe Safe-S-Cape® is a security screen window with a built-in emergency exit function. In an evacuation, you don't need a key or a tool - the panel releases from the inside in seconds. Safe-S-Cape® panels can be hinged at the top or sides and swing inward or outward, making them practical for bedrooms, hallways, and any window where a clear exit matters. All the protection of a standard Crimsafe screen. Ready to open when you need it to be.

Works with louvre, double hung and sliding windows

SECURITY SCREEN WINDOWS

Ensure your home is protected with Crimsafe® Security Screens.

Crimsafe security window screens use the same Tensile-Tuff® mesh and Screw-Clamp™ technology as the doors - fitted to your windows instead. Fixed window screens can be face-fitted, reveal-fitted, or installed in a flyscreen track, and they work across louvre, double-hung, and sliding windows.

There's a practical bonus most people don't expect - when fitted across the full window area, a Crimsafe Screen improves the window's solar heat gain coefficient by up to 53%. It blocks heat before it gets inside, which means your home stays cooler and your air conditioner works less.

Clear views,
secured by
Crimsafe

Safely maintaining your views while keeping a fresh breeze!

RETRACTABLE FLYSCREENS

Retractable Flyscreens offer all the benefits of a regular Flyscreen, with the added bonus of being able to retract.

Our Retractable Screens can be made with a rollaway (retract to the side) system, giving you the option to completely open up a space when desired. Extra stopping points can be added to the track, to allow for the screen to be secured at various points.

Wynstan offers Retractable Flyscreen solutions for all types of windows and doors including sliding, double hung, louvre, casement, awning windows or bi-fold doors. Choose between plain or striped mesh or a pleated style suited for larger openings.

SAFETY DOORS AND SCREENS

Wynstan Safety Doors and Screens provide an extra layer of security while also keeping insects outside.

Available in a hinged or sliding design and for extra peace of mind, Safety Doors can be fitted with a triple lock system. We can match your door to an existing doorframe and have a wide colour range to choose from. Mesh options include fibreglass and aluminium. The vision mesh is ideal for maintaining your views while keeping your privacy, and our paw-proof mesh with an optional doggy door will ensure that every member of the family is happy. There is also the option of matching sidelights for your doors. By fitting your windows and doors with our matching safety range, you can create a sleek, uniformed look.

Great for under the house ventilation

ROLL-UP FLYSCREENS

An entertainers favourite - keep the bugs out while not impacting the usability of your servery window.

Not only do they look good, but with frames that are powder coated to match your aesthetics, the are durable and strong, so you can trust these screens to stand the test of time!

FIXED FLYSCREENS

We may have enviable warm summers and a relaxed lifestyle, but Australia is also home to a number of unwanted insects.

Flyscreens are an affordable, environmentally friendly and effective solution to preventing insects entering your home. Wynstan Flyscreen frames can be 9mm or 11mm thick and can be powder coated to match your window frames. Choose between fibreglass mesh or, for a greater level of fire resistance, stainless steel mesh. Wynstan Flyscreens can also be designed to meet the bushfire regulations of your local area.

Let the
breeze in
while keeping
the bugs out
